RESEARCH GUIDELINES

The Divya Jyoti Ayurvedic Medical College operates under a comprehensive framework of research guidelines, which are meticulously designed to uphold the highest standards of academic integrity and scientific rigor. This framework governs all scholarly inquiries conducted by faculty and students, ensuring that each investigation contributes meaningfully to the advancement of Ayurvedic knowledge and practice.

The research process is initiated with the formal submission of a detailed research proposal to the designated institutional review board. This proposal must include a clearly articulated research question, a comprehensive literature review, and a justification for the study's significance.

A robust methodology is required, which details the research design, the chosen data collection instruments, and the proposed analytical techniques. Adherence to a pre-approved methodology is non-negotiable, thereby guaranteeing that the research process is systematic and reproducible.

During the execution phase, researchers are obligated to maintain meticulous and accurate records of all data, observations, and procedural modifications. All raw data are subject to periodic audit by the research committee to ensure fidelity and transparency.

It is incumbent upon the principal investigator to oversee all aspects of data management and security, safeguarding against unauthorized access or alteration.

The final stage of the research process involves the objective analysis of collected data and the drawing of conclusions that are directly substantiated by the evidence. The interpretation of findings is to be conducted with impartiality, avoiding speculative or unsubstantiated claims. Any and all publications or presentations resulting from the research must be prepared in strict accordance with the college's ethical standards and publication policies, thereby ensuring the scholarly integrity of the final output. The institution remains steadfastly dedicated to providing the necessary infrastructural and intellectual resources to facilitate all research initiatives that align with these established protocols.
